Suggestions, If any:

12 responses

Please the institute need to provide good equipments and practical computer knowledge to the textile students. For ex - good photoshop skills.

Please try to give more designing software classes to the students

I believe i have learnt so much from this institute. Only suggestion i want to give that institute need to give focus on softwares more and basic use of Microsoft office especially MS excel.. And if possible need to add on some Trend research and forecast classes more, I mean they do give such classes but it's important for students to do that more often, For this they can add some more projects.
And one more thing college gives us illustration classes but need to more focus on flat sketches and detailing because this is very important in industry..

Placement should be better

Lacking with print development/software/ skill which is in demand for a textile designer as well as digital portfolio development.

Alumni Satisfaction Survey 2020-2021

Need to introduce more technical knowledge and facilities in terms of designing which are currently required in the industry. Because even in India nowadays, the whole fashion industry is moving towards digitization.

should also need to look after trends and Forecasting, it is already there as a subject but I personally feel that there are something mission which need to be filled up so student can also get to know where is the industry going. Because of this pandemic situation things fashion is going through tremendous change and the concept of fashion is also change. So I personally thing, recent and forecasted updates for everyone in the education system is must, traditional knowledge won't work out alone.

Not Yet

1. Excel should be taught in advanced level.
2. Specification sheet and technical sketches should be focused more.
3. Excel in photoshop, illustrator, Corel, Indesign etc graphics softwares.
4. Strong Focus in ResearchWork (Trends, Forecasting, boards, story etc)

Workshop of extra language

Please do help in getting the students to the industrial placements like internship

No

I would like to add some points.

1. More focuse on digital softwares.
2. Need to improve internship & placement programs.
3. To ensure the piece of work created by the student is creative and authentic.
